ABOUT ME

Aspiring AI Engineer with a focus on machine learning, deep learning, Python, and NLP. Passionate about computer vision and developing innovative AI solutions. Committed to continuous learning and professional growth in the AI field.

EDUCATION

Sindh Madressatul Islam University

BS Artificial Intelligence

SKILLS

- Python
- · Machine Learning
- · Deep Learning
- NLP
- Computer Vision

PROJECTS

Face Mask Detection

- Develop a model to detect the presence of face masks
- Utilizes convolutional neural networks (CNNs) and data augmentation techniques for training.
- · Focuses on enhancing public health safety and compliance during health crises.

Laptop Price Predictor

- Predicts laptop prices based on features such as specifications and brand.
- · Uses regression algorithms for price estimation.
- Helps users make informed purchasing decisions by providing price estimates based on desired specifications.

Email Spam Classifier

- Develops a model to classify emails as spam or non-spam based on their content.
- Uses NLP techniques and algorithms for text classification.
- Aims to improve email filtering systems, reducing unwanted emails and enhancing productivity.

Plant Disease Classification

- Implements a deep learning model to identify and classify various plant diseases from images.
- Utilizes convolutional neural networks (CNNs) or accurate feature extraction and classification.
- Aims to assist farmers and agricultural experts in diagnosing plant health issues to improve crop yield and quality.
